Overview

Wire Transfers are used to electronically wire money (domestic, USD international, and foreign currency) between accounts with or without templates.

One-time wire transfers are performed on an as-needed basis. Template-based wires are based upon a pre-established template and intended for repetitive use.

Wire tasks include:

- Creating wire templates for repetitive use. If your company requires multiple approvals, new templates must be approved before they can be used.
 - Entering wire transfer requests (including recurring and one-time future dated transactions).
 - Transmitting wire transfer requests.
 - Reviewing wire transfer history.
-
